## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, drawn to a multidimensional camouflage textile, classified in class 428, subclass 156.
  - II. Claims 24-41, drawn to the method of making a 3-D camouflage textile, classified in class 002, subclass 69+.
  - III. Claims 42-66, drawn to a specific weave pattern camouflage textile, classified in class 442, subclass 208+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the camouflage textiles could be made by weaving the desired patterns of camouflage into the fabric as it is made instead of topically applying it as desired by Applicant.
3. Inventions III and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, in the claims of Group III, Applicant desires specific weaving patterns with a specific number of yarns that could formulate a different fabric, which could also not be used for the purposes of camouflaging, and thereby differing from the claims of Group I.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Jeffery Bacon on 12/04/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
